

Badger State Industries now offers...

SUBLIMATION

What is sublimation?

Sublimation happens when a substance transitions between the solid and gas states without going through a liquid stage; dry ice is an example.

What are the differences between Sublimation and Screen-Printing?

Screen-Print Limitations

- Up to 5 Spot Colors
- Flat Images
- Screen Charges
- Can feel screen print on garment

Sublimation Offers

- Unlimited Colors
- Photographic Images
- No Screen Charges
- Soft feel on garment
